

GBLS Demo Dashboard

Created by the GBLS MIT Code for Good team (Spring 2025):

- Rahsun Komatsuzaki-Fields
- David Oluigbo
- Davut Muhammetgulyyev

I. ABOUT

This is a demo database created using ReactJS. It serves as an interactive mockup of the internal dashboard to be created for GBLS to view client data. You can view the website [here](#) (may take some time to build)

This demo database pulls client information from a [spreadsheet](#) and displays graphs of quantities of various data. This data currently includes:

- Language
- Cities of Origin
- Client Info
 - Veterans
 - Disabled
 - DV/Sexual Assault
 - Sexual Orientation
- Race and Gender

The data on the demo database can be modified by adding/removing/changing data in the spreadsheet. To edit the spreadsheet, please request edit access.

There is also a search feature to find clients whose name starts with the given first and last name prefixes at the top.

II. DOWNLOADING

Visit the [public repository](#) and after cloning the project onto your computer, run **npm install** and **npm run build**.

To view the website on your local instance, run **npm run dev**
